

# Foundations Therapeutic Program

for 3-6 year olds diagnosed with autism

Where therapy happens through play, connection, and guided learning experiences.

A strong start begins here

## WHAT YOUR CHILD WILL GAIN

Stronger Social Skills

Improved Communication

School Readiness

Greater Independence

## TRULY INTEGRATED CARE LED BY EXPERIENCED CLINICIANS

Your child will receive ABA, Speech, and Occupational Therapies in one coordinated program, with therapists working together every day. This means goals are aligned, progress is more efficient, and skills carry over across all areas of development.

## ⇒ FREQUENTLY ASKED QUESTIONS ⇐

### What makes this program different?

Children learn best when they're engaged. That's why our approach is play-based, interactive, and intentional, so therapy feels motivating while still targeting meaningful outcomes like school readiness, social communication, and peer interaction.

### Will there be 1:1 support?

Every moment of therapy is purposeful, with 1:1 support throughout the program. We create a personalized treatment plan built around your child's strengths and developmental goals while focusing on skill acquisition and reducing challenging behaviors.

### Is there parent support?

You're part of your child's progress! Practical strategies you can use at home, and regular communication, are provided, as parent training is an important part of ABA, included in benefits coverage. Families are integral partners in achieving the long-term impact.

### What if my child needs more services?

Should your child require more hours of therapeutic services than we are able to accommodate during this program, our Center for Autism can continue to support with additional therapeutic hours, supported through benefits, after the program concludes.

### Is an autism diagnosis required?

Yes. To bill insurance for ABA services provided by our licensed therapists, insurance companies require an autism diagnosis. Our office staff will submit this information during the benefits verification process.

### What will a typical day look like?

Themed circle time, followed by a rotation of activities and therapies designed to support each child's unique goals are part of every day. There will also be opportunities for group activities, cooperative play, games, snack time, and more.

### How are services billed?

Your insurance plan will be billed for each therapeutic service received, depending on your child's individualized plan and benefits coverage. Preauthorization for services will be completed during the onboarding process.
